Summary

Results-driven Full Stack Developer skilled in React.js, Next.js, and TypeScript. Experienced in building responsive, full-stack web applications with intuitive user interfaces. Eager to leverage technical expertise and problem-solving skills to deliver high-performance digital experiences.

Experience

Software Intern - AariyaTech, Remote Dec 2025 - Present

- Engineered an AI-Driven CV Optimization System using Next.js, TypeScript, and Google GenAI. Developed custom parsing logic to compute ATS scores and eliminate LLM data hallucinations, increasing data extraction accuracy by 15%.
- Architected a Tiered Appointment Booking Flow by developing a stateful, multi-step scheduling sequence. Integrated frontend timezone handling with real-time backend slot validation, reducing booking conflicts by 20%.
- Built and Streamlined Dynamic UI Interfaces utilizing React Hook Form, Tailwind CSS, and Radix UI. Resolved deep TypeScript bottlenecks and eliminated data inconsistencies, improving form submission reliability across 5+ complex data-entry workflows.

Summer Intern - Tata Steel Ltd., Jharkhand Aug 2023 - Oct 2023

- Developed a fraudulent image detection system by implementing and evaluating Custom FaceNet and ResNet-50 Convolutional Neural Networks.
- Optimized model training pipelines across real and fake face datasets using Adam optimization, learning rate scheduling, and binary cross-entropy loss.
- Interpreted model predictions by utilizing Saliency Maps and GradCAM++ to visualize and analyze the neural network's critical decision-making regions.

Projects

CinePulse - A Movie, TV Show & Anime Guide May 2025 - Jul 2025

- Developed a responsive, full-stack entertainment database to streamline the discovery of movies, TV shows, and anime.
- Engineered the user-facing frontend and server-side API routing, reducing data retrieval time by 20% through optimized component rendering and state management.
- Designed an intuitive UI/UX featuring multi-parameter search and filtering, improving content discoverability across 3 distinct entertainment categories.

Woven Words - A Full-Stack Literary Blog May 2025 - Jul 2025

- Developed a full-stack literary blog dedicated to sharing original poems, prose, and personal reflections.
- Engineered a responsive reading interface using Next.js, implementing server-side rendering to achieve fast page load times for seamless content delivery.
- Built an interactive user engagement system that supports seamless commenting and sharing functionalities, fostering community interaction across multiple post categories.

SleepTracker - A Personal Sleep Analytics Web App Apr 2025 - Jun 2025

- Built a server-side rendered web application utilizing Next.js to monitor and analyze personal sleep habits, supporting continuous daily data logging.
- Implemented seamless user authentication using Clerk, ensuring secure session management and strict data privacy for individual user profiles.
- Developed interactive data visualization features mapping up to 30+ days of sleep duration and quality metrics, enabling users to easily identify long-term health trends.

Skills Summary

Languages: Java, JavaScript, TypeScript, HTML, CSS, SQL
Frameworks & Libraries: React.js, Next.js, Node.js, Spring Boot
Databases: MongoDB, Neon, Supabase, Firebase
Tools & Technologies: Git, Postman, Docker, RESTful APIs, Clerk, Power BI

Education

Vellore Institute of Technology September 2021 - May 2025
Bachelor of Technology in Electronics and Computer Engineering (CGPA: 9.15) *Chennai, India*

Tarapore School Agrico May 2018 - Jun 2020
Indian School Certificate (ISC board : 80.75%) *Jamshedpur, India*
