SUMMARY

Results-driven Full Stack Developer skilled in React.js, Next.js, and TypeScript. Experienced in building responsive, full-stack web applications with intuitive user interfaces. Eager to leverage technical expertise and problem-solving skills to deliver high-performance digital experiences.

EXPERIENCE

Full Stack Developer I - AariyaTech, Remote

Mar 2026 - Present

- Spearheaded a 6-member engineering team (4 interns, 2 developers) to build and deploy production-ready AI agents using Python and Google ADK. Orchestrated deployment on Google Cloud Run and integrated the agentic workflows into a Next.js Web App (JSO), establishing a scalable AI platform.
- Implemented an End-to-End Stripe Subscription Architecture integrating custom checkout sessions with real-time backend state validation. Engineered secure webhook handlers for instant user access provisioning upon successful payment, ensuring automated fulfillment accuracy.
- Engineered a Centralized License Management Dashboard leveraging Next.js, TypeScript, and optimized server-side rendering. Built secure workflows for automated key generation, real-time validation tracking, and one-click access revocation, decreasing provisioning-related support inquiries by 30%.

Software Intern - AariyaTech, Remote

Dec 2025 - Mar 2026

- Engineered an AI-Driven CV Optimization System using Next.js, TypeScript, and Google GenAI. Developed custom parsing logic to compute ATS scores and eliminate LLM data hallucinations, increasing data extraction accuracy by 15%.
- Architected a Tiered Appointment Booking Flow by developing a stateful, multi-step scheduling sequence. Integrated frontend timezone handling with real-time backend slot validation, reducing booking conflicts by 20%.
- Built and Streamlined Dynamic UI Interfaces utilizing React Hook Form, Tailwind CSS, and Radix UI. Resolved deep TypeScript bottlenecks and eliminated data inconsistencies, improving form submission reliability across 5+ complex data-entry workflows.
- Implemented an automated weekly database and code repository backup system utilizing GitHub Actions, ensuring data integrity and streamlining CI/CD pipelines.

PROJECTS

CinePulse - A Movie, TV Show & Anime Guide 🔄

May 2025 - Jul 2025

- Developed a responsive, full-stack entertainment database to streamline the discovery of movies, TV shows, and anime.
- Engineered the user-facing frontend and server-side API routing, reducing data retrieval time by 20% through optimized component rendering and state management.
- Designed an intuitive UI/UX featuring multi-parameter search and filtering, improving content discoverability across 3 distinct entertainment categories.

Woven Words - A Full-Stack Literary Blog 🔄

May 2025 - Jul 2025

- Developed a full-stack literary blog dedicated to sharing original poems, prose, and personal reflections.
- Engineered a responsive reading interface using Next.js, implementing server-side rendering to achieve fast page load times for seamless content delivery.
- Built an interactive user engagement system that supports seamless commenting and sharing functionalities, fostering community interaction across multiple post categories.

SKILLS SUMMARY

Languages: Java, JavaScript, TypeScript, Python, HTML, CSS, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Spring Boot, Google ADK

Databases: MongoDB, Neon, Supabase

Cloud & DevOps: Google Cloud Run, Firebase, GitHub Actions, Docker

Tools & Technologies: Git, Postman, RESTful APIs, Clerk, Power BI

EDUCATION

Vellore Institute of Technology 🏛️

September 2021 - May 2025

Bachelor of Technology in Electronics and Computer Engineering (CGPA: 9.15)

Chennai, India

Tarapore School Agrico 🏡

May 2018 - Jun 2020

Indian School Certificate (ISC board : 80.75%)

Jamshedpur, India
